

WILLBURG POT TOP-COATER

Save time and money at despatch:
topping the pots helps prevent weed and moss growth.
A clean and tidy plant looks healthier and sells easier!

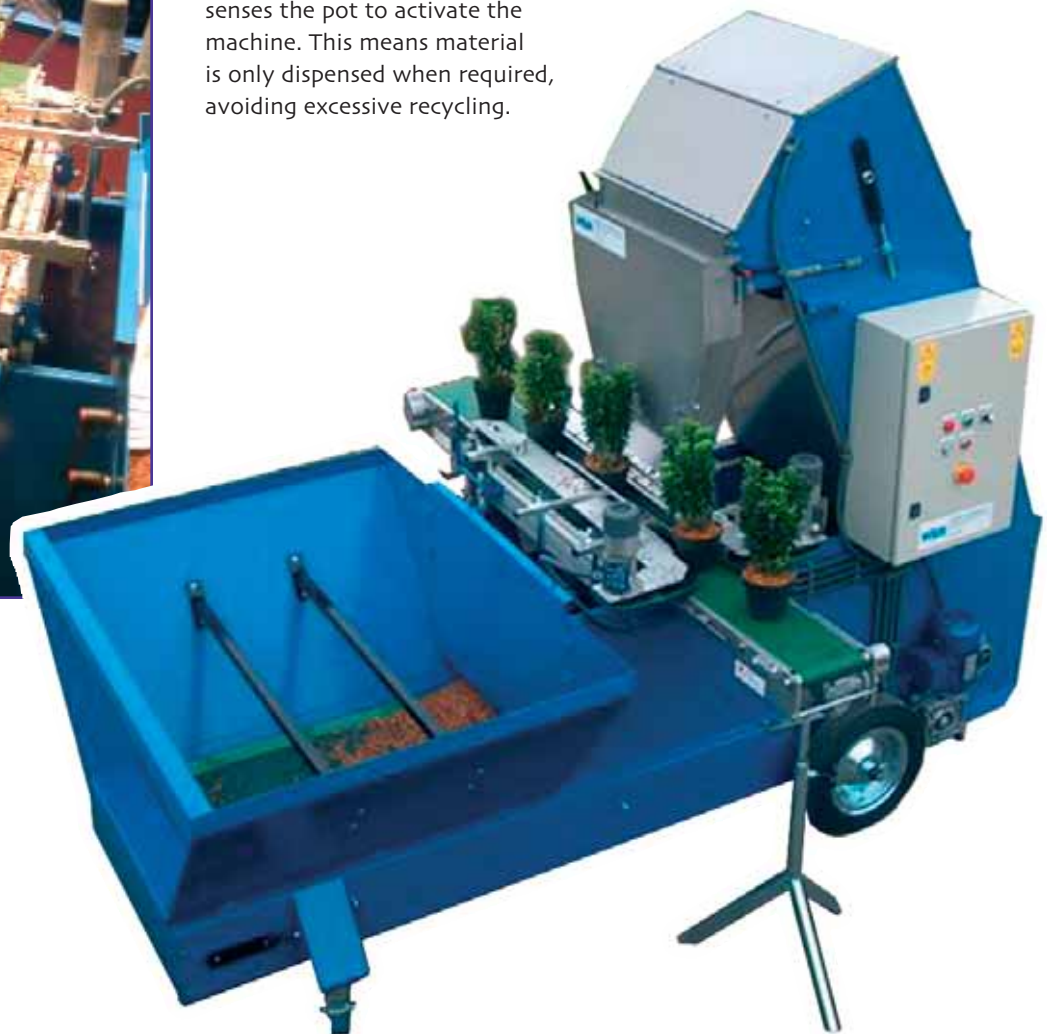

◀ A magic eye on the conveyor senses the pot to activate the machine. This means material is only dispensed when required, avoiding excessive recycling.

Height and angle-adjustable chute for delivering material to the correct spot in the pot. ▼

- ▶ 7 variable-speed motors enable individual control of speed, rotation and material flow.
- ▶ Up to 8,000 pots per hour may be finished with a layer of bark or Bio-Top.

- ▶ Input and output conveyors can be made to the size required.
- ▶ Material is delivered on to a short wide conveyor by a chain and flight elevator, this is variable-speed and delivers a constant even flow of material to the discharge chute, thus helping prevent material surges.
